

TECHNICAL CHARTING OPINION

eResearch Corporation is pleased to feature a technical opinion by Chris Kimble of Kimble Charting Solutions.

Mr. Kimble states, on his website www.kimblechartingsolutions.com, that his goal for his investment research is to:

... help people to enlarge portfolios regardless of market direction by looking for patterns at extreme points of "exhaustion" with a high probability of reversing, called TBNM: tops, bottoms, no middles. The intent is to simplify the decision-making process.

Mr. Kimble has been in financial services for over 30 years.

His research is intended to simplify investment decisions and increase confidence with charts that are clear as to the pattern at hand and action to take. His strategy is to look for chart patterns at extreme exhaustion points that have a high probability of reversing. These extremes reflect excess fear and greed of global investors and, therefore, they can be capitalized upon.

By providing research showing markets at extremes of long term resistance or support, and including bullish/bearish sentiment readings when available, Mr. Kimble attempts to help investors simplify their decision-making, reduce risk, increase confidence, and improve results.

Today's article begins on the following page, and is entitled:

Gold & Silver Knocking On Break-Out Door Again

Gold & Silver Knocking On Break-Out Door Again

(To enlarge the chart below, place cursor on chart, and <Ctrl-Click>)

Silver and Gold have continued to head lower since highs reached back in 2011. Is the 6-year bear market nearing an end?

The chart below looks at the Silver/Gold ratio over the past decade. To be long and strong Silver and Gold, the preference would be for this ratio to be heading higher.

The ratio has formed a clean falling channel (series of lower highs and lower lows) inside of (1).

Three different times it knocked on the underside of falling resistance at (2), only to be turned away.

The ratio is making another attempt to break out this week at (3). If the ratio does break out, it would send a positive message to Silver, Gold, and Mining stocks.

***e*Research Corporation**

***e*Research** was established in 2000 as Canada's first equity issuer-sponsored research organization. As a primary source for professional investment research, our Subscribers (*subscription is free!!!*) benefit by having written research on a variety of small- and mid-cap, under-covered companies. We also provide unsponsored research reports on middle and larger-sized companies, using a combination of fundamental and technical analysis. We complement our corporate research coverage with a diversified selection of informative, insightful, and thought-provoking research publications from a wide variety of investment professionals. We provide our professional investment research and analysis directly to our extensive subscriber network of discerning investors, and electronically through our website: www.eResearch.ca.
