

TECHNICAL CHARTING OPINION

eResearch Corporation is pleased to feature a technical opinion by Chris Kimble of Kimble Charting Solutions.

Mr. Kimble states, on his website www.kimblechartingsolutions.com, that his goal for his investment research is to:

... help people to enlarge portfolios regardless of market direction by looking for patterns at extreme points of "exhaustion" with a high probability of reversing, called TBNM: tops, bottoms, no middles. The intent is to simplify the decision-making process.

Mr. Kimble has been in financial services for over 30 years.

His research is intended to simplify investment decisions and increase confidence with charts that are clear as to the pattern at hand and action to take. His strategy is to look for chart patterns at extreme exhaustion points that have a high probability of reversing. These extremes reflect excess fear and greed of global investors and, therefore, they can be capitalized upon.

By providing research showing markets at extremes of long term resistance or support, and including bullish/bearish sentiment readings when available, Mr. Kimble attempts to help investors simplify their decision-making, reduce risk, increase confidence, and improve results.

Today's article begins on the following page, and is entitled:

Big Loss Presents Opportunity in Junior Miners

Big Loss Presents Opportunity in Junior Miners

(To enlarge the charts below, place cursor on chart, and <Ctrl-Click>)

The Junior Miner ETF has had a rough go of it the past 90 days. Could that large decline present an opportunity?

The chart below looks at the performance of GDXJ over 90-day windows since inception.

<Ctrl-Click> ON CHART TO ENLARGE

GDXJ has fallen nearly 25% over the past 90 days. When GDXJ has been down this hard in a 90-day window, during a bear market, it was closer to a short-term low than a high.

The chart below looks at the chart pattern of GDXJ and the GDXJ/GDX ratio.

The large decline and the two charts directly above reflect that GDXJ was presenting an entry point, where a rally should take place.

eResearch Corporation

eResearch was established in 2000 as Canada's first equity issuer-sponsored research organization. As a primary source for professional investment research, our Subscribers (*subscription is free!!!*) benefit by having written research on a variety of small- and mid-cap, under-covered companies. We also provide unsponsored research reports on middle and larger-sized companies, using a combination of fundamental and technical analysis. We complement our corporate research coverage with a diversified selection of informative, insightful, and thought-provoking research publications from a wide variety of investment professionals. We provide our professional investment research and analysis directly to our extensive subscriber network of discerning investors, and electronically through our website: www.eResearch.ca.
