

## TECHNICAL CHARTING OPINION

**eResearch Corporation** is pleased to feature a technical opinion by Chris Kimble of Kimble Charting Solutions.

Mr. Kimble states, on his website [www.kimblechartingsolutions.com](http://www.kimblechartingsolutions.com), that his goal for his investment research is to:

... help people to enlarge portfolios regardless of market direction by looking for patterns at extreme points of "exhaustion" with a high probability of reversing, called TBNM: tops, bottoms, no middles. The intent is to simplify the decision-making process.

Mr. Kimble has been in financial services for over 30 years.

His research is intended to simplify investment decisions and increase confidence with charts that are clear as to the pattern at hand and action to take. His strategy is to look for chart patterns at extreme exhaustion points that have a high probability of reversing. These extremes reflect excess fear and greed of global investors and, therefore, they can be capitalized upon.

By providing research showing markets at extremes of long term resistance or support, and including bullish/bearish sentiment readings when available, Mr. Kimble attempts to help investors simplify their decision-making, reduce risk, increase confidence, and improve results.

Today's article begins on the following page, and is entitled:

### **Gold Testing Break-Out Level**

## Gold Testing Break-Out Level

(To enlarge the chart below, place cursor on chart, and <Ctrl-Click>)

Gold has been losing ground to the US\$ since 2011, as each rally has been nothing more than a counter-trend rally, where it runs out of steam. It has been a long 6 years for metals bulls, but could this frustrating stretch of disappointments be about to end?

The chart below looks at the Gold/US\$ ratio over the past 10 years:

<Ctrl-Click> ON CHART TO ENLARGE

At this time, the Gold/Dollar ratio is testing 800 pound resistance at (1). One of the most important tests for Gold bulls in years is in play at this time.

For 6 years, rallies have run out of steam for this ratio at lower and lower highs. Will it be different this time? If it is, I would sure want to be on the long side of Gold. I would follow a break-out, if it would happen to take place

## ***e*Research Corporation**

***e*Research** was established in 2000 as Canada's first equity issuer-sponsored research organization. As a primary source for professional investment research, our Subscribers (*subscription is free!!!*) benefit by having written research on a variety of small- and mid-cap, under-covered companies. We also provide unsponsored research reports on middle and larger-sized companies, using a combination of fundamental and technical analysis. We complement our corporate research coverage with a diversified selection of informative, insightful, and thought-provoking research publications from a wide variety of investment professionals. We provide our professional investment research and analysis directly to our extensive subscriber network of discerning investors, and electronically through our website: [www.eResearch.ca](http://www.eResearch.ca).
