

Daily Economic Comment: July 17, 2017

eResearch Corporation is pleased to provide the daily economic commentary courtesy of **Capital Economics**. To access the commentary, click on the link below.

Capital Economics has over 60 economists stationed in five international offices around the world to provide truly global coverage, sectoral expertise, and sound economic forecasts.

In addition to economic comments on countries around the world, highlights from today's commentary include the following:

- Will house prices affect monetary policy in Canada and Australia? (see Day Chart)
- We think UK CPI inflation edged down in June
- Fallout from ECB taper talk probably weighed on German investor sentiment

#####

eResearch was established in 2000 as Canada's first equity issuer-sponsored research organization. As a primary source for professional investment research, our Subscribers (*subscription is free!!!*) benefit by having written research on a variety of small- and mid-cap, under-covered companies. We also provide unsponsored research reports on middle and larger-sized companies, using a combination of fundamental and technical analysis.

We complement our corporate research coverage with a diversified selection of informative, insightful, and thought-provoking research publications from a wide variety of investment professionals. We provide our professional investment research and analysis directly to our extensive subscriber network of discerning investors, and electronically through our website: www.eresearch.ca.

eResearch does not manage money or trade with the general public, provides full disclosure of all fee arrangements, and adheres to the strict application of its Best Practices Guidelines.
