

TECHNICAL CHARTING OPINION

eResearch Corporation is pleased to feature a technical opinion by Chris Kimble of Kimble Charting Solutions.

Mr. Kimble states, on his website www.kimblechartingsolutions.com, that his goal for his investment research is to:

... help people to enlarge portfolios regardless of market direction by looking for patterns at extreme points of "exhaustion" with a high probability of reversing, called TBNM: tops, bottoms, no middles. The intent is to simplify the decision-making process.

Mr. Kimble has been in financial services for over 30 years.

His research is intended to simplify investment decisions and increase confidence with charts that are clear as to the pattern at hand and action to take. His strategy is to look for chart patterns at extreme exhaustion points that have a high probability of reversing. These extremes reflect excess fear and greed of global investors and, therefore, they can be capitalized upon.

By providing research showing markets at extremes of long term resistance or support, and including bullish/bearish sentiment readings when available, Mr. Kimble attempts to help investors simplify their decision-making, reduce risk, increase confidence, and improve results.

Today's article begins on the following page, and is entitled:

Copper Working On Multi-Year Break-Out

Copper Working On Multi-Year Break-Out

(To enlarge the chart below, place cursor on chart, and <Ctrl-Click>)

Ole Doc Copper has had its head in the sand over the past 6 years, creating lower highs since 2011.

Over the past three years, it also has created another series of lower highs reflected in the chart below. Doc Copper could be attempting to do something it has not done for years in the chart below.

<Ctrl-Click> ON CHART TO ENLARGE

A breakout attempt could be in play this week, as Doc Copper is testing falling resistance line (1) at (2) at about US\$2.7280/lb. A break-out here and above highs hit earlier this year, would be bullish for Copper.

BW: Here is Kimble's last comment on copper, on June 8th.
