

Long-Term Perspective

July 8, 2017

Model Oil Portfolio

We have created a high-quality portfolio of oil stocks with a focus on recovery and growth.

NOTE: *The Model Oil Portfolio has a longer-term perspective. As such, we will update it once a week, using Friday's closing prices. Also, it will be essentially a Buy-and-Hold portfolio, with minimal trading involved. The portfolio will always be fully invested.*

The initial investment will be a total of \$500,000. To begin with, each of the twenty stocks has an equal weighting, meaning the dollar amount of each holding will be approximately \$25,000. If a stock is sold, the replacement stock will begin with the amount of the closing proceeds of the stock sold. Any residual will be put into "Cash".

We will conduct a portfolio assessment at the end of each month when we will decide whether changes should be made.

INITIAL COMMENT: *A sea of **RED**! The Oil Sector continued to take a pounding over the past two days. Every stock in the portfolio is coloured **RED**. All of the benchmarks are similarly "under water". All things must pass!*

To avoid any confusion with our Top Twenty Portfolio, we changed the name of this portfolio from Top Twenty Oil Portfolio to Model Oil Portfolio.

The current portfolio is presented on the following page.
