

Long-Term Perspective

July 14, 2017

Model Oil Portfolio

We have created a high-quality portfolio of oil stocks with a focus on recovery and growth.

NOTE: *The Model Oil Portfolio has a longer-term perspective. As such, we will update it once a week, using Friday's closing prices. Also, it will be essentially a Buy-and-Hold portfolio, with minimal trading involved. The portfolio will always be fully invested.*

The initial investment will be a total of \$500,000. To begin with, each of the twenty stocks has an equal weighting, meaning the dollar amount of each holding will be approximately \$25,000. If a stock is sold, the replacement stock will begin with the amount of the closing proceeds of the stock sold. Any residual will be put into "Cash".

We will conduct a portfolio assessment at the end of each month when we will decide whether changes should be made.

COMMENT: *The portfolio is slowly clawing itself back towards break-even. We now have five positive stocks, up from four in our last report. First day, there were none! Bonavista Energy is the current leader. Crescent Energy is the bad boy! The rankings are shown on Page 4. The portfolio currently is down 1.7%. The price of crude oil (WTIC) is up 1.1%.*

The current portfolio is presented on the following page.
