

## TECHNICAL CHARTING OPINION

**eResearch Corporation** is pleased to feature a technical opinion by Chris Kimble of Kimble Charting Solutions.

Mr. Kimble states, on his website [www.kimblechartingsolutions.com](http://www.kimblechartingsolutions.com), that his goal for his investment research is to:

... help people to enlarge portfolios regardless of market direction by looking for patterns at extreme points of "exhaustion" with a high probability of reversing, called TBNM: tops, bottoms, no middles. The intent is to simplify the decision-making process.

Mr. Kimble has been in financial services for over 30 years.

His research is intended to simplify investment decisions and increase confidence with charts that are clear as to the pattern at hand and action to take. His strategy is to look for chart patterns at extreme exhaustion points that have a high probability of reversing. These extremes reflect excess fear and greed of global investors and, therefore, they can be capitalized upon.

By providing research showing markets at extremes of long term resistance or support, and including bullish/bearish sentiment readings when available, Mr. Kimble attempts to help investors simplify their decision-making, reduce risk, increase confidence, and improve results.

Today's article begins on the following page, and is entitled:

### **Gold/Dollar Ratio: Monster Break-Out Test In Play!**

## Gold/Dollar Ratio: Monster Break-Out Test In Play!

(To enlarge the chart below, place cursor on chart, and <Ctrl-Click>)

The Gold/Dollar chart below reflects that Gold was much stronger than the U.S. Dollar (US\$) from 2001 until 2011.

Since 2011, the US\$ has been stronger than Gold, as the ratio has declined for 6 years. Is it time for the worm to turn (Gold stronger than US\$)? The ratio below reflects a big test that is in play, which could answer this very important question.

<Ctrl-Click> ON CHART TO ENLARGE

The Gold/US\$ ratio hit rising support line (1) at (2) earlier this year, which held and a rally then followed, as the US\$ hit a high and Gold has rallied. This pattern could be part of a bullish ascending triangle that is forming. The top of this potential pattern is being tested this month at (3).

If the ratio breaks out at (3), Gold, Silver, and miners could do very well, and it would send a positive message for the metals space that is has not seen in a couple of years!

## ***e*Research Corporation**

***e*Research** was established in 2000 as Canada's first equity issuer-sponsored research organization. As a primary source for professional investment research, our Subscribers (*subscription is free!!!*) benefit by having written research on a variety of small- and mid-cap, under-covered companies. We also provide unsponsored research reports on middle and larger-sized companies, using a combination of fundamental and technical analysis. We complement our corporate research coverage with a diversified selection of informative, insightful, and thought-provoking research publications from a wide variety of investment professionals. We provide our professional investment research and analysis directly to our extensive subscriber network of discerning investors, and electronically through our website: [www.eResearch.ca](http://www.eResearch.ca).
