Channel-Breakers Portfolio

We have created a Portfolio of stocks by utilizing the “Weekly” Early Warnings segment from TheUpTrend.com technical charting system (link below).

NOTE: *The Channel-Breakers Portfolio has an intermediate-term perspective. Since this stock portfolio is based on weekly stock charts, we will be updating this report only once a week, on the week-end. Any decisions made on the week-end will be reflected in a Buy, Sell, or Short transaction effected at Monday's Opening Price.*

COMMENT: *A slight decline this past week. We are going to buy Precision Drilling at Monday's open. But that will still leave us with a sizable cash position.*

For comparative purposes, the following graph depicts the performance, since initiation, of the eResearch portfolio (BLUE line) against the S&P/TSX Composite Index (PINK line).

The portfolio is performing better than the broad market index:

Portfolio performance = 1.3% stocks only; after dividends and trading profits = 7.0%

S&P/TSX Composite = 5.9%

As at November 3:

Below, we set out our guidelines (Modus Operandi) for administering the Portfolio.

MODUS OPERANDI

The composition of the Channel-Breakers Portfolio is based on theUpTrend.com Weekly charts. We focus on the “Early Warnings” segment of the Weekly Trend Report from the website.

The Weekly charts are intermediate-term in nature, meaning the stocks are held not for trading purposes but for the more likelihood of achieving longer-term capital gains.

Using the weekly charts, we evaluate those stocks that have moved above or below their respective channel-lines.

We started with \$100,000 cash and, when appropriate, we choose either one or two stocks and put an arbitrary approximate \$10,000 in each stock pick. The buy price or the short-sell price will be at Monday’s opening price. All short sells will require the mandatory 30% margin.

We will continue buying or shorting until the Portfolio is fully “invested”, although this could include a sizable cash position. The portfolio is monitored daily and reported on weekly.

If a stock closes at or higher than its Second Target price at the end of a week then, automatically, 1/2 of the position will be sold at Monday’s opening price. Using TheUpTrend.com system, the stock will be further evaluated and, if there is possible further upside, then it will be retained. If not, the entire position will be sold at Monday’s opening. There could be exceptions.

Also, if a stock receives a change of opinion in TheUpTrend.com by breaking below the lower channel-line at the end of a week, then it will be sold at Monday’s opening price.

Similarly, for a stock sold short, if the stock rises above the upper channel-line at the end of a week, then that stock will be bought back at Monday’s opening price, and the 30% margin requirement will be deleted.

If, during the week, the stock plunges dramatically such that it closes 7% or more below its purchase price, then that stock will be sold at the next day’s opening price.

Similarly, if a stock sold short rises dramatically at any time during the week such that it closes 5% or more above its contract price, then that stock will be sold at the next day’s opening price. Stocks sold either will be replaced, or the sales proceeds will augment the cash portion.
