

TECHNICAL CHARTING OPINION

eResearch Corporation is pleased to feature a technical opinion by Chris Kimble of Kimble Charting Solutions.

Mr. Kimble states, on his website www.kimblechartingsolutions.com, that his goal for his investment research is to:

... help people to enlarge portfolios regardless of market direction by looking for patterns at extreme points of "exhaustion" with a high probability of reversing, called TBNM: tops, bottoms, no middles. The intent is to simplify the decision-making process.

Mr. Kimble has been in financial services for over 30 years.

His research is intended to simplify investment decisions and increase confidence with charts that are clear as to the pattern at hand and action to take. His strategy is to look for chart patterns at extreme exhaustion points that have a high probability of reversing. These extremes reflect excess fear and greed of global investors and, therefore, they can be capitalized upon.

By providing research showing markets at extremes of long term resistance or support, and including bullish/bearish sentiment readings when available, Mr. Kimble attempts to help investors simplify their decision-making, reduce risk, increase confidence, and improve results.

Today's article begins on the following page, and is entitled:

Historical Market Similarities

Historical Market Similarities

(To enlarge the charts below, place cursor on chart, and <Ctrl-Click>)

The two charts below look at the Dow from two different time frames. A 100-year look-back on the left, and a 35-year look-back on the right.

<CTRL-CLICK> ON CHART TO ENLARGE

As you can see, the Dow is in a very strong and well defined long-term rising bull trend! Nothing of late has changed that!!! The strong rally since the 2009 lows has the Dow back at the top of this quality rising channel, attempting a break-out.

The left chart reflects that momentum is at levels seldom seen in the past 100 years. Other key times momentum was this high was back in 1929, 1987, 2000, and 2007.

Bulls need to see break-outs, not selling getting started at (1)!

The next set of charts shown below looks at key stock indices around the world:

<CTRL-CLICK> ON CHART TO ENLARGE

The respective charts reflect that the world is highly correlated (i.e., look-alike patterns)!

Again, Bulls need to see break-outs, not selling getting started at (1)!

If break-outs take place at each (1), it would be super bullish news because markets around the world would remain in uptrends!

eResearch Corporation

eResearch was established in 2000 as Canada's first equity issuer-sponsored research organization. As a primary source for professional investment research, our Subscribers (*subscription is free!!!*) benefit by having written research on a variety of small- and mid-cap, under-covered companies. We also provide unsponsored research reports on middle and larger-sized companies, using a combination of fundamental and technical analysis. We complement our corporate research coverage with a diversified selection of informative, insightful, and thought-provoking research publications from a wide variety of investment professionals. We provide our professional investment research and analysis directly to our extensive subscriber network of discerning investors, and electronically through our website: www.eResearch.ca.
