

Long-Term Perspective

June 1, 2018

Model Oil Portfolio

We have created a high-quality portfolio of oil stocks with a focus on recovery and growth.

NOTE: The Model Oil Portfolio has a longer-term perspective. As such, we will update it once a week, using Friday's closing prices. Also, it will be essentially a Buy-and-Hold portfolio, with minimal trading involved. The portfolio will always be fully invested.

The initial investment will be a total of \$500,000. To begin with, each of the twenty stocks has an equal weighting, meaning the dollar amount of each holding will be approximately \$25,000. If a stock is sold, the replacement stock will begin with the amount of the closing proceeds of the stock sold. Any residual will be put into "Cash".

We will conduct a portfolio assessment at the end of each month when we will decide whether changes should be made.

COMMENT: One month to go and we will wind this portfolio up and start a new one, which will have far fewer stocks in it. And, we will weight the stocks unequally rather than all of them have the same weighting. The portfolio rose 1.0% this past week, but the Energy Index was up 1.7%.

The current portfolio is presented on the following page.
