

# **Long-Term Perspective**

June 29, 2018

# **Model Oil Portfolio**

We have created a high-quality portfolio of oil stocks with a focus on recovery and growth.

**NOTE**: The Model Oil Portfolio has a longer-term perspective. As such, we will update it once a week, using Friday's closing prices. Also, it will be essentially a Buy-and-Hold portfolio, with minimal trading involved. The portfolio will always be fully invested.

The initial investment will be a total of \$500,000. To begin with, each of the twenty stocks has an equal weighting, meaning the dollar amount of each holding will be approximately \$25,000. If a stock is sold, the replacement stock will begin with the amount of the closing proceeds of the stock sold. Any residual will be put into "Cash".

We will conduct a portfolio assessment at the end of each month when we will decide whether changes should be made.

**COMMENT**: This is the final edition of this Oil Portfolio. We are starting a new one as of July  $3^{rd}$ . It will be more pro-active. This portfolio began exactly one year ago, a turbulent time for the energy sector. Many stock performed admirably; others faltered badly. Having 20 stocks in the portfolio thus got its share of good-performers as well as bad-performers. The final score, including dividends and trading profits, was that the portfolio was up 0.6%.

The closing portfolio is presented on the following page.
