

## TECHNICAL CHARTING OPINION

**eResearch Corporation** is pleased to feature a technical opinion by Chris Kimble of Kimble Charting Solutions.

Mr. Kimble states, on his website [www.kimblechartingsolutions.com](http://www.kimblechartingsolutions.com), that his goal for his investment research is to:

... help people to enlarge portfolios regardless of market direction by looking for patterns at extreme points of "exhaustion" with a high probability of reversing, called TBNM: tops, bottoms, no middles. The intent is to simplify the decision-making process.

Mr. Kimble has been in financial services for over 30 years.

His research is intended to simplify investment decisions and increase confidence with charts that are clear as to the pattern at hand and action to take. His strategy is to look for chart patterns at extreme exhaustion points that have a high probability of reversing. These extremes reflect excess fear and greed of global investors and, therefore, they can be capitalized upon.

By providing research showing markets at extremes of long term resistance or support, and including bullish/bearish sentiment readings when available, Mr. Kimble attempts to help investors simplify their decision-making, reduce risk, increase confidence, and improve results.

Today's article begins on the following page, and is entitled:

### **Small Caps Attempting 20-Year Breakout**

## Small Caps Attempting 20-Year Breakout

(To enlarge the chart below, place cursor on chart, and <Ctrl-Click>)

<CTRL-CLICK> ON CHART TO ENLARGE

The Russell 2000 trend remains solidly higher, as it has created a series of higher lows and higher highs inside of the rising channel (1) over the past 25 years.

Small caps have been an upside leader in 2018, as they are very near all-time highs.

We applied Fibonacci extension levels to the 2007 highs and 2009 lows at each (2).

Small caps are now attempting a dual breakout at (3).

This is a price point that small-cap bulls would LOVE to see strength and a break-out take place, as monthly momentum is lofty.
