

## CHART OF THE DAY

*September 28, 2018*

### *Spotlight on : 10-2 Yield Curve*

**COMMENT:** *The spreads for both the U.S. and Canadian 10-year to 2-year yields each moved down two basis points this past week. These levels are far from the 0.00x benchmark that warns of a possible recession. They fell from 0.26x to 0.24x for U.S. Treasury spreads and from 0.24x to 0.22x for Canadian spreads. The U.S. 10-year yield, at 3.05%, remained above the cautionary 3.00% mark. So, this past week, rates and the spread cooled off a bit after the previous week's meaningful rise. With just three months remaining, there is no evidence to suggest that there is a need to fear a recession starting in 2018, particularly with continuing strong corporate earnings performance and strong economic performance by many indicators. The ten-year bull may not be over yet in the United States, but starting to become more defensive in one's equity portfolio might be advisable.*

- The ratio of 10-year U.S. Treasury yields to 2-year U.S. Treasury yields on Friday, September 28 stood at 0.24x down from 0.26x a week ago. On June 1, the spread was 0.42x and, at the end of 2017, it was 0.51x.
- From June 1 until September 1, the 10-year U.S. Treasuries yield moved basically sideways. Since September 1, the yield has been rising, from 2.86% to the current 3.05%. The 2-year yield has been rising since June 1, from 2.47% to 2.81%.
- In Canada, the spread on Friday, September 28 was 0.22x down from 0.24x a week ago. On June 1, it was 0.43x, and was 0.34x at year-end 2017.
- Canadian rates have been slightly more erratic since June 1 but have not risen overall as much as in the USA. 10-year Canadas are up from 2.33% to the current 2.41%. The 2-year yield has been rising slowly since June 1, from 1.90% to the current 2.19%.
- For 2018, the yield curve in both the USA and Canada has been declining, until September. Since then, it has been rising slightly. This past week it dipped in Canada.
- A declining spread that approaches 0.00x or that actually goes negative (or inverts) signifies slowing economic growth and, even, the likelihood of a recession.
- A recession usually occurs a few months after the yield curve inverts (see the long-term chart on page 5).

- Sometimes, a negative yield curve gives a false positive (again, see the long-term chart).
- A negative or inverted yield curve indicates that long-term debt instruments have a lower yield than short-term debt instruments, given that these debt instruments are of the same or similar credit quality.
- Historically, inversions of the yield curve have preceded many U.S. recessions. Thus, the yield curve is considered an important barometer for predicting turning points in the business cycle.

31-Aug-18	2.86	2.62	0.24
3-Sep-18	2.86	2.64	0.22
4-Sep-18	2.86	2.62	0.24
5-Sep-18	2.90	2.66	0.24
6-Sep-18	2.88	2.64	0.24
7-Sep-18	2.94	2.71	0.23
10-Sep-18	2.94	2.73	0.21
11-Sep-18	2.98	2.76	0.22
12-Sep-18	2.97	2.74	0.23
13-Sep-18	2.97	2.76	0.21
14-Sep-18	2.99	2.78	0.21
17-Sep-18	2.99	2.78	0.21
18-Sep-18	3.05	2.81	0.24
19-Sep-18	3.08	2.81	0.27
20-Sep-18	3.07	2.81	0.26
21-Sep-18	3.07	2.81	0.26
24-Sep-18	3.08	2.83	0.25
25-Sep-18	3.10	2.83	0.27
26-Sep-18	3.06	2.83	0.23
27-Sep-18	3.06	2.83	0.23
28-Sep-18	3.05	2.81	0.24

The U.S. Treasuries 10-2 spread has risen recently and has broken above its down-trend line:

## Canadas 10-2 Yield Ratio

<u>DATE</u>	<u>10-YEAR</u>	<u>CANADA 2-YEAR</u>	<u>DIFF</u>
1-Jun-18	2.33	1.90	0.43
8-Jun-18	2.27	1.90	0.37
15-Jun-18	2.21	1.85	0.36
22-Jun-18	2.14	1.82	0.32
29-Jun-18	2.13	1.85	0.28
6-Jul-18	2.14	1.91	0.23
13-Jul-18	2.16	1.94	0.22
20-Jul-18	2.11	1.93	0.18
3-Aug-18	2.36	2.08	0.28
10-Aug-18	2.33	2.11	0.22
17-Aug-18	2.25	2.08	0.17
20-Aug-18	2.26	2.11	0.15
21-Aug-18	2.25	2.10	0.15
22-Aug-18	2.26	2.10	0.16
23-Aug-18	2.25	2.11	0.14
24-Aug-18	2.25	2.12	0.13
27-Aug-18	2.26	2.13	0.13
28-Aug-18	2.29	2.14	0.15
29-Aug-18	2.31	2.14	0.17
30-Aug-18	2.32	2.14	0.18
31-Aug-18	2.31	2.14	0.17
3-Sep-18	2.28	2.11	0.17
4-Sep-18	2.22	2.06	0.16
5-Sep-18	2.23	2.05	0.18
6-Sep-18	2.24	2.05	0.19
7-Sep-18	2.23	2.06	0.17
10-Sep-18	2.29	2.11	0.18
11-Sep-18	2.28	2.11	0.17
12-Sep-18	2.32	2.13	0.19
13-Sep-18	2.33	2.14	0.19
14-Sep-18	2.32	2.14	0.18
17-Sep-18	2.34	2.13	0.21
18-Sep-18	2.34	2.13	0.21
19-Sep-18	2.38	2.15	0.23
20-Sep-18	2.42	2.17	0.25
21-Sep-18	2.42	2.18	0.24
24-Sep-18	2.43	2.18	0.25
25-Sep-18	2.44	2.19	0.25
26-Sep-18	2.46	2.20	0.26
27-Sep-18	2.42	2.19	0.23
28-Sep-18	2.41	2.19	0.22

Similarly, the Canadas 10-2 spread has broken above the down-trend line:

## U.S. Treasuries 10-2 Yield Ratio Since January 1, 2000

Here is a look at the 10-2 yield curve going back to January 2000. It shows the negative occurrences (below 0.0x) and the corresponding recessions (shaded areas) that soon followed. Currently, despite the falling trend-line, there is still further to go to reach the inversion level and the possibility of a resulting recession. The current ratio is 0.24x, down slightly this week.

- We are now experiencing the longest stock market up-trend in history, so it is natural to expect, eventually, that the economy will fall into recession. As the long-term chart above shows, once the 10-2 yield curve goes negative, an economic recession soon follows, but it is not coincidental and, interestingly, the recession occurs well after the yield curve has returned to positive and started a sharp rise. Also, as shown in early 2006 in the chart above, it can give a false positive. Despite the discouraging down-trend that is occurring, U.S. economic growth still continues positively and, therefore, the possibility of a near-term recession in the United States still seems remote at this point. However, we will continue to monitor that downward trend.
- There is growing angst among many market pundits that the U.S. Federal Reserve will have increasing difficulty fending off the risk of recession as inflation rises against the back-drop of: an economy at near capacity; unemployment at decade lows; two+ years of consecutive quarterly earnings and revenue beats/gains such that, going forward, positive comparisons will become more difficult to achieve; interest rates on the rise; and tariff threats infecting global trading arrangements and resulting in investment uncertainty.
