

TECHNICAL CHARTING OPINION

eResearch Corporation is pleased to feature a technical opinion by Chris Kimble of Kimble Charting Solutions.

Mr. Kimble states, on his website www.kimblechartingsolutions.com, that his goal for his investment research is to:

... help people to enlarge portfolios regardless of market direction by looking for patterns at extreme points of "exhaustion" with a high probability of reversing, called TBNM: tops, bottoms, no middles. The intent is to simplify the decision-making process.

Mr. Kimble has been in financial services for over 30 years.

His research is intended to simplify investment decisions and increase confidence with charts that are clear as to the pattern at hand and action to take. His strategy is to look for chart patterns at extreme exhaustion points that have a high probability of reversing. These extremes reflect excess fear and greed of global investors and, therefore, they can be capitalized upon.

By providing research showing markets at extremes of long term resistance or support, and including bullish/bearish sentiment readings when available, Mr. Kimble attempts to help investors simplify their decision-making, reduce risk, increase confidence, and improve results.

Today's article begins on the following page, and is entitled:

Gold Miners Attempting Multi-Year Break-Out

Gold Miners Attempting Multi-Year Break-Out

(To enlarge the charts below, place cursor on chart, and <Ctrl-Click>)

<CTRL-CLICK> ON CHART TO ENLARGE

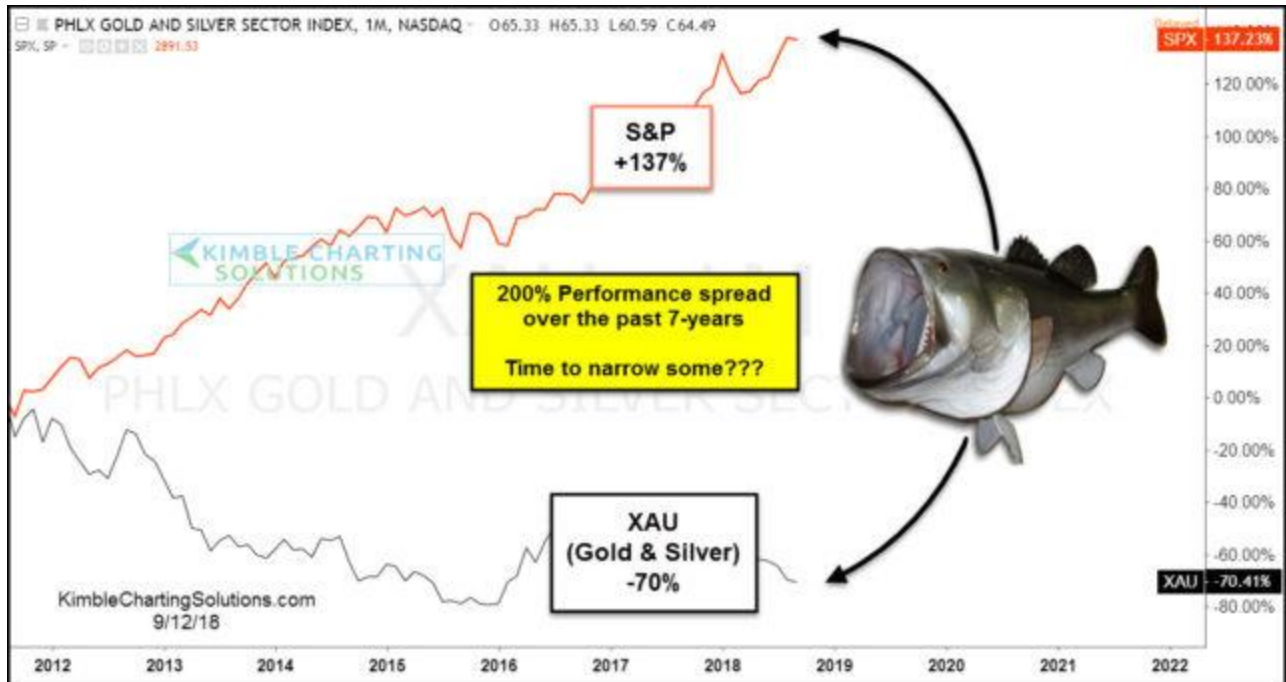

The Junior Miners/Senior Miners Ratio (GDXJ/GDX) can often signal when key turning points are about to take place for Gold & Silver Miners.

The chart above looks at this ratio, which highlights that a multi-year narrowing pennant pattern has been forming (higher lows and lower highs).

Despite Gold, Silver, [GDX](#), and [GDXJ](#) heading much lower over the past several months, this important ratio has actually been heading higher and it is facing a key break-out test at (1).

Should this ratio break out, it would send a short-term bullish message to the out-of-favor mining sector.

The next chart, below, looks at the spread between the S&P 500 and Gold/Silver Index (XAU) over the past 7 years

CLICK ON CHART TO ENLARGE

If the GDXJ/GDX ratio breaks out, the odds increase that the large spread between the S&P and the XAU index will narrow!

If you are interested in short & long-term investment solutions for Gold, Silver, Miners, and Copper, being a [Metals Member](#) could become a big advantage for you!
