

## TECHNICAL CHARTING OPINION

**eResearch Corporation** is pleased to feature a technical opinion by Chris Kimble of Kimble Charting Solutions.

Mr. Kimble states, on his website [www.kimblechartingsolutions.com](http://www.kimblechartingsolutions.com), that his goal for his investment research is to:

... help people to enlarge portfolios regardless of market direction by looking for patterns at extreme points of "exhaustion" with a high probability of reversing, called TBNM: tops, bottoms, no middles. The intent is to simplify the decision-making process.

Mr. Kimble has been in financial services for over 30 years.

His research is intended to simplify investment decisions and increase confidence with charts that are clear as to the pattern at hand and action to take. His strategy is to look for chart patterns at extreme exhaustion points that have a high probability of reversing. These extremes reflect excess fear and greed of global investors and, therefore, they can be capitalized upon.

By providing research showing markets at extremes of long term resistance or support, and including bullish/bearish sentiment readings when available, Mr. Kimble attempts to help investors simplify their decision-making, reduce risk, increase confidence, and improve results.

Today's article begins on the following page, and is entitled:

**Silver & Gold: Best Buy-Point in 20 Years?**

## Silver & Gold: Best Buy-Point in 20 Years?

(To enlarge the charts below, place cursor on chart, and <Ctrl-Click>)

The chart below looks at the Silver/Gold Ratio over the past 30 years.

<CTRL-CLICK> ON CHART TO ENLARGE

Historically, when the ratio is heading higher, it sends a message to be long and strong both Gold & Silver.

When the ratio is heading lower, historically it has been a great time to avoid Gold & Silver.

The ratio has been heading lower since the highs back in 2011, suggesting now is not the time to buy and hold Silver & Gold.

The decline in the ratio over the past 7 years has it currently testing the 1995 lows as well as a potential support line at (2).

Q: Is this the best time to buy Silver & Gold in the past 25 years?

A: The ratio needs to find support and rally at (2) if it is to send a strong buy signal to Silver & Gold!
