

TECHNICAL CHARTING OPINION

eResearch Corporation is pleased to feature a technical opinion by Chris Kimble of Kimble Charting Solutions.

Mr. Kimble states, on his website www.kimblechartingsolutions.com, that his goal for his investment research is to:

... help people to enlarge portfolios regardless of market direction by looking for patterns at extreme points of "exhaustion" with a high probability of reversing, called TBNM: tops, bottoms, no middles. The intent is to simplify the decision-making process.

Mr. Kimble has been in financial services for over 30 years.

His research is intended to simplify investment decisions and increase confidence with charts that are clear as to the pattern at hand and action to take. His strategy is to look for chart patterns at extreme exhaustion points that have a high probability of reversing. These extremes reflect excess fear and greed of global investors and, therefore, they can be capitalized upon.

By providing research showing markets at extremes of long term resistance or support, and including bullish/bearish sentiment readings when available, Mr. Kimble attempts to help investors simplify their decision-making, reduce risk, increase confidence, and improve results.

Today's article begins on the following page, and is entitled:

Commodities and Rates Attempting Breakouts at the Same Time!

Commodities and Rates Attempting Breakouts at the Same Time!

(To enlarge the chart below, place cursor on chart, and <Ctrl-Click>)

When it comes to assets being in long-term bull markets, commodities and interest rates do not come to mind, as each has endured long-term bear markets. Could these long-term trends be coming to an end? Possibly!

<CTRL-CLICK> ON CHART TO ENLARGE

The 2-pack above looks at [Commodities ETF \(DBC\)](#) and the [Yield on the 10-Year note](#) on a monthly basis over the past decade.

Each is attempting to break out above resistance levels at the same time at each (1). We have not seen this type of an attempt in years and years, my friends!

If these long-term trends are changing directions, numerous out-of-favor commodity assets could do well going forward.

***e*Research Corporation**

***e*Research** was established in 2000 as Canada's first equity issuer-sponsored research organization. As a primary source for professional investment research, our Subscribers (*subscription is free!!!*) benefit by having written research on a variety of small- and mid-cap, under-covered companies. We also provide unsponsored research reports on middle and larger-sized companies, using a combination of fundamental and technical analysis. We complement our corporate research coverage with a diversified selection of informative, insightful, and thought-provoking research publications from a wide variety of investment professionals. We provide our professional investment research and analysis directly to our extensive subscriber network of discerning investors, and electronically through our website: www.eResearch.ca.
