

Long-Term Perspective

October 5, 2018

## Model Oil Portfolio

We have created a high-quality portfolio of oil stocks with a focus on recovery and growth.

**NOTE:** The Model Oil Portfolio has a longer-term perspective. As such, we will update it once a week, using Friday's closing prices. Also, it will be essentially a Buy-and-Hold portfolio, with minimal trading involved.

The initial investment will be a total of \$300,000. To begin with, we chose and purchased twelve stocks, but with varying initial positions. If a stock is sold and replaced, the maximum position in the new holding will be governed by the amount of cash in the portfolio, to a limit of \$25,000. Any residual will be put into "Cash" and is available to purchase a new stock holding.

**COMMENT:** The Portfolio did fairly well again this past week, with its value up slightly, slipped about 1.0%. The number of stocks in positive territory remains at 6. We bought back a position in Husky Energy after it tanked following its announcement of a hostile bid for MEG Energy. We have three potential "buy" companies on our radar screen, but we will hold off any acquisitions for now. Seven Generations and Peyto Exploration remain the top two performers while Canadian Natural Resources and Baytex Energy are the biggest percentage laggards.

The current portfolio is presented below.

## GRAPHIC COMPARISON

For comparative purposes, the following graph depicts the performance, since initiation, of the eResearch portfolio (thin **BLUE** line) against the S&P/TSX Energy Index (**GREEN** line), the price of Crude Oil (**PURPLE** line), and the S&P/TSX Composite Index (**RUST** line).

The portfolio is down slightly, and is out-performing the two industry indexes and the overall market:

Portfolio performance = -0.1% (includes dividends and trading profits)

S&P/TSX Energy Index = -6.4%

Crude Oil price (WTIS) = +0.2%

S&P/TSX Composite = -2.0%
