

## TECHNICAL CHARTING OPINION

**eResearch Corporation** is pleased to feature a technical opinion by Chris Kimble of Kimble Charting Solutions.

Mr. Kimble states, on his website [www.kimblechartingsolutions.com](http://www.kimblechartingsolutions.com), that his goal for his investment research is to:

... help people to enlarge portfolios regardless of market direction by looking for patterns at extreme points of "exhaustion" with a high probability of reversing, called TBNM: tops, bottoms, no middles. The intent is to simplify the decision-making process.

Mr. Kimble has been in financial services for over 30 years.

His research is intended to simplify investment decisions and increase confidence with charts that are clear as to the pattern at hand and action to take. His strategy is to look for chart patterns at extreme exhaustion points that have a high probability of reversing. These extremes reflect excess fear and greed of global investors and, therefore, they can be capitalized upon.

By providing research showing markets at extremes of long term resistance or support, and including bullish/bearish sentiment readings when available, Mr. Kimble attempts to help investors simplify their decision-making, reduce risk, increase confidence, and improve results.

Today's article begins on the following page, and is entitled:

### **Economic Indicators Testing Critical Levels!**

## Economic Indicators Testing Critical Levels!

(To enlarge the chart below, place cursor on chart, and <Ctrl-Click>)

<CTRL-CLICK> ON CHART TO ENLARGE

The above 2-pack looks at a couple of very important sectors of our economy, [Home Builders](#) and [U.S. Concrete](#).

Both have been hit very hard this year, declining large percentages. Both have been much weaker than the broad markets.

The declines this year have both testing 7-year rising channels at each (1).

If both break support at each (1), it is possible that they would be suggesting the economy will be soft going forward.
