

TECHNICAL CHARTING OPINION

eResearch Corporation is pleased to feature a technical opinion by Chris Kimble of Kimble Charting Solutions.

Mr. Kimble states, on his website www.kimblechartingsolutions.com, that his goal for his investment research is to:

... help people to enlarge portfolios regardless of market direction by looking for patterns at extreme points of "exhaustion" with a high probability of reversing, called TBNM: tops, bottoms, no middles. The intent is to simplify the decision-making process.

Mr. Kimble has been in financial services for over 30 years.

His research is intended to simplify investment decisions and increase confidence with charts that are clear as to the pattern at hand and action to take. His strategy is to look for chart patterns at extreme exhaustion points that have a high probability of reversing. These extremes reflect excess fear and greed of global investors and, therefore, they can be capitalized upon.

By providing research showing markets at extremes of long term resistance or support, and including bullish/bearish sentiment readings when available, Mr. Kimble attempts to help investors simplify their decision-making, reduce risk, increase confidence, and improve results.

Today's article begins on the following page, and is entitled:

**Interest Rates Fall 14%, Despite Fed Action!
Bad News For Stocks? Was In 2000 & 2007!**

Interest Rates Fall 14%, Despite Fed Action! Bad News For Stocks? Was In 2000 & 2007!

(To enlarge the chart below, place cursor on chart, and <Ctrl-Click>)

Interest rates set by the world are actually falling, in the face of the Fed raising them!

The chart below looks at interest rate yields over the past 6 weeks, which reflects they are actually declining quite quickly.

<CTRL-CLICK> ON CHART TO ENLARGE

The yield on the 2-year note has declined 10% and yields on the 2- & 5-year notes have declined over 14%. While this decline in rates has taken place, the S&P 500 has declined 10%.

We shared that observation in 2000 & 2007, that falling rates were bad for stocks. [See Post here](#)
