

TECHNICAL CHARTING OPINION

eResearch Corporation is pleased to feature a technical opinion by Chris Kimble of Kimble Charting Solutions.

Mr. Kimble states, on his website www.kimblechartingsolutions.com, that his goal for his investment research is to:

... help people to enlarge portfolios regardless of market direction by looking for patterns at extreme points of "exhaustion" with a high probability of reversing, called TBNM: tops, bottoms, no middles. The intent is to simplify the decision-making process.

Mr. Kimble has been in financial services for over 30 years.

His research is intended to simplify investment decisions and increase confidence with charts that are clear as to the pattern at hand and action to take. His strategy is to look for chart patterns at extreme exhaustion points that have a high probability of reversing. These extremes reflect excess fear and greed of global investors and, therefore, they can be capitalized upon.

By providing research showing markets at extremes of long term resistance or support, and including bullish/bearish sentiment readings when available, Mr. Kimble attempts to help investors simplify their decision-making, reduce risk, increase confidence, and improve results.

Today's article begins on the following page, and is entitled:

Doc Copper About To Hurdle Important Breakout Level?

Doc Copper About To Hurdle Important Breakout Level?

(To enlarge the chart below, place cursor on chart, and <Ctrl-Click>)

Copper often times sends important messages, to the global economy, reflecting growth or lack thereof. An important price test is currently in play for [Ole Doc Copper!](#)

<Ctrl-Click> on above chart to enlarge

The long-term trend for Copper remains up, as it has created a series of higher lows for the past 18-years along line (1). Over the past few months, Copper could be creating a double bottom just above this long-term rising support line at (2).

The small rally of late has Copper testing the top of its 6-month trading range at (3).

Can Copper hurdle this important break-out level?

Keep a close eye on Copper at (3), as it could be about to send an important message to many markets by what it does at this key price point!
