

## **TECHNICAL CHARTING OPINION**

**DISCLOSURE:** *The contents of this report were researched, analyzed, and written by Chris Kimble of **KIMBLE CHARTING SOLUTIONS**, and were put into this report format, and published and distributed by **eResearch Corporation**.*

**eResearch Corporation** is pleased to feature a technical opinion by Chris Kimble of Kimble Charting Solutions. Today's article begins on the following page, and is entitled:

### **Who is Lying? Crude Oil, Stocks, or Yields?**

---

Mr. Kimble states, on his website [www.kimblechartingsolutions.com](http://www.kimblechartingsolutions.com), that his goal for his investment research is to:

... help people to enlarge portfolios regardless of market direction by looking for patterns at extreme points of "exhaustion" with a high probability of reversing, called TBNM: tops, bottoms, no middles. The intent is to simplify the decision-making process.

Chris Kimble

Mr. Kimble has been in financial services for over 30 years.

His research is intended to simplify investment decisions and increase confidence with charts that are clear as to the pattern at hand and action to take. His strategy is to look for chart patterns at extreme exhaustion points that have a high probability of reversing. These extremes reflect excess fear and greed of global investors and, therefore, they can be capitalized upon.

By providing research showing markets at extremes of long-term resistance or support, and including bullish/bearish sentiment readings when available, Mr. Kimble helps investors simplify their decision-making, reduce risk, increase confidence, and improve results.

You can access his website and subscribe to his service at the following link:

## Who is Lying? Crude Oil, Stocks, or Yields?

(To enlarge the chart below, place cursor on chart, and <Ctrl-Click>)

Crude Oil, Stocks, and Yields have experienced a high degree of correlation over the past few months. All three peaked together near the end of September and all three bottomed together near Christmas. This month a big divergence is taking place!.

<Ctrl-Click> on above chart to enlarge

The chart above reflects that Crude Oil and the S&P have created a series of higher lows, while Yields have created a series of lower highs.

One of the largest divergences in a year is taking place as the month of March is coming to an end.

Most likely a game of “**Catch Up**” needs to take place, as the spread has become rather large. Stocks and Crude will chase Yields lower or Yields will rally to move closer to rising Crude and Stock prices.

Watch these support and resistance lines for clues to the upcoming game of “Catch Up!”
